Executive Summary

AWS Certified Cloud & AI Practitioner with nearly 3 years of experience managing, developing, and supporting enterprise production environments and cloud-native architectures. Hands-on expertise in AWS Cloud services, Infrastructure as Code (Terraform), containerization (Docker), and CI/CD pipelines (GitHub Actions). Proven track record in SRE practices, resolving 40–50+ monthly production incidents and access requests within strict SLAs while reducing unplanned downtime by 15%. Leveraging AI-assisted automation to accelerate root-cause analysis by 25%.

Technical Skills

- **Cloud Architecture (AWS & Azure):** AWS EC2, S3, Lambda, API Gateway, DynamoDB, CloudFront, VPC, IAM, CloudWatch, Azure Fundamentals (AZ-900), Azure AI Fundamentals (AI-900).
- **Infrastructure as Code & DevOps:** Terraform (Modules, Remote State), Docker, Git, GitHub Actions (CI/CD), Ansible.
- **SRE & Production Operations:** Incident & Problem Management, Root Cause Analysis (RCA), SLA Compliance, System Monitoring, ServiceNow.
- **Programming & Databases:** Python (Boto3), SQL, Bash/Shell Scripting, Java, MS SQL Server (SSMS), Amazon DynamoDB, MySQL.
- **OS, Networking & AI Tools:** Linux, Windows Server, TCP/IP, DNS, HTTP/HTTPS, GitHub Copilot, Claude Code, Prompt Engineering, AI-Assisted Debugging.

Work Experience

Software Engineer | Tech Mahindra Limited Dec 2023 – Present

Project: Optivision Production (Infrastructure & Application Support)

- Maintain and monitor mission-critical enterprise production servers and application environments, reducing unplanned downtime by 15% through proactive health checks.
- Triage, diagnose, and resolve high-priority production incidents within strict SLAs; execute diagnostic SQL queries via SSMS for data validation, transaction troubleshooting, and real-time anomaly remediation.
- Govern end-to-end IAM and access management workflows, processing user provisioning, role modification, and de-provisioning requests while enforcing least-privilege RBAC compliance.
- Applied AI-assisted tools (ChatGPT, Claude) for automated log parsing, query debugging, and RCA documentation, accelerating root-cause isolation and issue resolution speed by ∼25%.

Project: Enterprise MES Cloud Application Engineer

- Designed, developed, and deployed scalable, browser-based manufacturing applications using low-code MES platforms (**Tulip, Plex**), digitizing shop-floor workflows for enterprise operations.
- Integrated frontend operator applications with cloud-hosted SQL databases and storage solutions to ingest real-time machine telemetry, production logs, and error records, ensuring 100% audit traceability.
- Implemented user authentication, role-based access controls, and automated issue tracking within an Agile framework, improving operator efficiency and reducing manual dependencies.

Cloud Architecture & DevOps Projects

Serverless Full-Stack Web Application on AWS (ap-south-1) S3, CloudFront, API Gateway, Lambda, DynamoDB, IAM

- Architected and deployed an event-driven serverless application hosting static frontend assets on S3, distributed via CloudFront CDN with OAC security.
- Developed backend REST APIs using API Gateway integrated with AWS Lambda (Python/Boto3) for stateless business logic and DynamoDB CRUD operations.
- Configured granular IAM roles, least-privilege policies, CORS rules, and CloudWatch Logs for real-time observability and invocation tracing.

Automated Multi-Tier AWS Infrastructure & CI/CD Pipeline Terraform, VPC, EC2, S3, Docker, GitHub Actions

- Authored modular Terraform configurations provisioning a custom VPC across multiple AZs with Public/Private subnets, Internet Gateways, and Security Groups.
- Provisioned EC2 compute instances running containerized workloads via Docker, utilizing S3 remote state storage and DynamoDB state locking.
- Built an automated CI/CD pipeline using GitHub Actions (`terraform fmt`, `validate`, `plan`) triggered on Git commits for reliable infrastructure delivery.

Certifications

- **AWS Certified AI Practitioner** & **AWS Certified Cloud Practitioner** – Amazon Web Services
- **Microsoft Certified: Azure Fundamentals (AZ-900)** & **Azure AI Fundamentals (AI-900)** – Microsoft | **GitHub Copilot Certified** – GitHub
- **Google Cloud:** Introduction to Generative AI, Cloud Computing Foundations – Google | **Prompt Engineering** – Udemy
- **Tech Mahindra Certified:** AI White Belt L1 (GenAI Fundamentals), Claude Code 101 | **Tulip Advanced App Developer**

Education

Bachelor of Technology (B.Tech) in Electronics & Communication Engineering 2020 – 2023
Sri Venkateswara Engineering College, Tirupati, Andhra Pradesh *CGPA: 7.67*

Diploma in Electronics & Communication Engineering 2017 – 2020
Sree Vidyanikethan Engineering College, Chittoor, Andhra Pradesh *Percentage: 89.05%*
